South Sutter Water District, Project No. 2997-019

Order Amending License and Approving Revised Exhibit

(Issued June 21, 1999)

J. Mark Robinson, Director, Division of Licensing and Compliance.

On July 28, 1998, South Sutter Water District, licensee for the Camp Far West Project, FERC Project No. 2997, filed a revised Exhibit F drawing for the Commission's approval. The project is located on the Bear River, Nevada, Yuba and Placer Counties, California.

The license issued July 2, 1981, ¹ authorized the project with a 45-foot wide and 60-foot long concrete powerhouse. The powerhouse was to contain one vertical Kaplan 9,000-HP turbine, and one generator rated 6,800 kW, 0.9 power factor, 60 Hertz, 13.8 kV.

The revised Exhibit F shows a 54'-0" wide and 57'-8" long powerhouse. The powerhouse contains a single vertical shaft Francis turbine of 8,960 HP, connected to a generator rated at 6,800 kW.

Our review of the project found that, the changes were noted during a final construction inspection report but the license was never amended to reflect the as-built conditions of the project. We also found that, the installed capacity of the turbine is slightly different from the license. However, the installed capacity of the project for annual charges purposes is 6,800 kW, limited by the nameplate capacity of the generator unit, and would not change.

This order approves the revised exhibit, which conforms to the Commission's rules and regulations. This order revises the description of the project to reflect its as-built condition. This order does not change the authorized installed capacity, nor does it materially affect the Commission's determination that the Camp Far West Project is best adapted to a comprehensive plan for the waterway.

The Director orders:

(A) The license for the Camp Far West Project, FERC Project No. 2997, is amended as provided by this order, effective the first day of the month in which this order is issued.

(B) Ordering Paragraph (B)(2) of the license, which describes the project works, is amended in part as follows:

(2) Project works consisting of:"..;(f) 54'-0" wide and 57'-8" long concrete powerhouse containing one vertical shaft Francis 8,960 HP turbine and one generator rated at 6,800 kW, 0.9 power factor, 60 Hertz, 13.8 kV; . . ."

(C) The following revised Exhibit F drawing filed on July 28, 1998, conforms to the Commission's rules and regulations and is approved and made part of the license. The superseded exhibit is eliminated from the license.

FERC

EXHIBIT DRAWING NO. FERC DRAWING TITLE SUPERSEDING

F-2 2997-13 POWERHOUSE PLAN AND SECTIONS 2997-2

(D) Within 90 days of the date of issuance of this order, the licensee shall file three sets of aperture cards of the approved exhibit drawing. The sets must be reproduced on silver or gelatin 35-mm microfilm and mounted on type D (31/4" x 73/8") aperture cards.

Prior to microfilming, the FERC Drawing Number (2997-13) shall be shown in the margin below the title block of the approved drawing. After mounting, the FERC Drawing Number should be typed on the upper right corner of the aperture card. Additionally, the Project Number, FERC Exhibit (*e.g.*, F-2), Drawing Title, and date of this order must be typed on the upper left corner of each aperture card. See Figure 1.

[64,544]
