

## APPENDIX D

# INFORMATION SOURCES

---

Appendix D provides a listing of source documents that SSWD evaluated in its search for existing, relevant, and reasonably available information for inclusion in Section 3, Existing Environment, of this PAD. SSWD focused its search on finding “source documents” that is, a document that contained original source data and associated conclusions, interpretations, and other information developed *de novo* by the author(s). Documents and sources of information that were generally avoided included: 1) general natural history descriptions such as general descriptions of species life cycles, ranges of occurrence, and behavior; 2) technology references such as manuals concerning development of models; 3) reviews and compendiums that do not contain source information, but oftentimes use another’s information in an editorial fashion; 4) technical references such as general limnology text books; and 5) anecdotal information that cannot be verified. In addition, management and policy documents were avoided except to the extent that they were used solely to describe agency management and policies that apply specifically to the Project Area.

The documents evaluated are presented in Tables D1 through D14. The tables are organized by the following resource areas:

- Table D1 – Introduction and Existing Environment
- Table D2 – Geology and Soils
- Table D3 – Water Resources
- Table D4 – Aquatic Resources
- Table D5 – Terrestrial Resources
- Table D6 – Threatened and Endangered Species
- Table D7 – Recreation
- Table D8 – Land Use
- Table D9 – Aesthetic Resources
- Table D10 – Socio-economic Resources
- Table D11 – Cultural Resources
- Table D12 – Tribal Interests
- Table D13 – Air Resources
- Table D14 – Noise

Not all of the existing and reasonably available information found during SSWD’s search was relevant to this PAD, yet the source was still listed in Appendix D for completeness and to document due diligence. When a document verified information from another reference, it may

not have been cited, but it was included in Appendix D. When a document provided relevant information for more than one resource area, the document is repeated in the appropriate tables.

Each Appendix D table includes two key pieces of information: a complete citation; and the location of the document. In some cases, the source document can be found on the Internet, in which case the website address of the document is listed. In some cases, the document is an article from a journal or periodical or report that SSWD has obtained or is otherwise a document in SSWD's possession. Those documents can be obtained by a third party, at a reasonable cost for reproduction and postage, by contacting SSWD. Note that some sources of information are Geographic Information System (GIS) files.

During preparation of the PAD, SSWD identified some source documents that are considered "Privileged" for one or more reasons. Such documents are so indicated; however, SSWD may not distribute such documents to a third party. Examples of Privileged documents include GIS files or maps that contain the specific location of cultural sites, and reports that FERC considers contain Critical Energy Infrastructure Information. Those who wish copies of the information in these documents should contact the appropriate authorities.
