

APPENDIX E

PROJECT MAPS

Appendix E provides detailed maps of the Project. The maps, which are in a scale of 1:24,000 and generally proceed from upstream to downstream, show all Project facilities and features and include the existing FERC Project Boundary, and show the Bear River from the Project to the confluence with the Feather River. Each map shows: elevation contours; county borders; rivers and streams including river miles in tenths of a mile; dams, diversions and other non-Project facilities; cities and towns; roads; stream flow and reservoir storage gages; railroads and transmission lines; and other major landmarks. Each map also shows land ownership (e.g., federal by land management agency, State of California, SSWD, and others).

Table E-1 provides for each map the appropriate river basin and a description of the Project facilities (and river miles) shown on the map.

Table E-1. List of 1:24,000 scale Project maps.

Map Number	Description
1	Bear River arm of Project and upstream gage
2	Project reservoir facilities
3	Non-Project diversion and Bear River downstream of Project
4	Bear River downstream of Project
5	Bear River downstream of Project
6	Confluence of Bear River and Feather River
